Redefine of USR

· USR is a **philosophy or principle for social movement**, which can be perceived as a philosophy of a university to use an **ethical approach** to develop and engage with the local and global community in order to **sustain the social, ecological, environmental, technical, and economic development**.

· USR acts as a **key player for social changes**, as USR implies having a **policy of ethical quality**, governing the performance of the university community. This is done via the responsible management of the educational cognitive, labor, and environmental impact from the university, in an interactive dialogue with society and its communities, in order to promote **sustainable human development through education (transforming knowledge), provision of service, research, teaching, and scholarship**.

· All of these underline an **ethical collaboration not only with the university community but also with business community in terms of stakeholder involvement**
